- Led by licensed Occupational Therapists and Speech Language Pathologists, the Pre-K social group is a fun, interactive program to build skills in the areas of **Language & play**, **Motor development** and **School readiness**.
- **Language & Play:** The program is designed to develop and nurture cooperative and imaginary play skills. Language is elicited through play by creating natural opportunities for social interactions.
- **School Readiness:** The program will help children develop basic skills needed to actively participate in the classroom such as attending, waiting, turn taking, sharing, staying with group and pairing language with eye gaze.
- **Motor Development:** Children engage in a variety of adult directed, sensory-based activities in order to develop and refine gross and fine motor development.

Call us to arrange a tour of **KiDA's** state-of-the-art facility!
